

7th November 2019

Dear Colleague

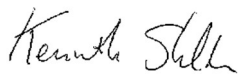

Letter of Endorsement: Helix Research and Evaluation

The Wellcome Genome Campus Public Engagement team has commissioned *Helix Research and Evaluation* (Margaret Macadam and Ruth Townsley) to conduct a review of the Campus's public engagement programme.

As part of this review, we are seeking insight from Campus staff and students who are actively involved in engaging the public with their research, and/or in supporting/leading public engagement initiatives across Campus. This will involve taking part in a short focus group or interview at a time that suits you sometime during Monday 18th to Wednesday 20th November.

We welcome any input that you can provide to Helix, which will ultimately inform the development of the Campus's public engagement programme going forwards. Should you wish to discuss any aspect of the review, or your potential involvement prior to engaging with Helix, please feel free to contact me.

Kind regards,

Ken Skeldon
Head of Public Engagement
